SOLUTIONS & SCENARIOS

AI BUSINESS SOLUTIONS FOR SOUTHEAST ASIA.

Connecting the Dots for People, Processes and AI

Singapore · October 2026

THE PROBLEM

EVERYONE KNOWS TO ADOPT AI. FEW KNOW WHAT TO IMPLEMENT.

Costs keep climbing

Singapore salaries and rents make every new hire a big bet for a small team.

Tools nobody uses

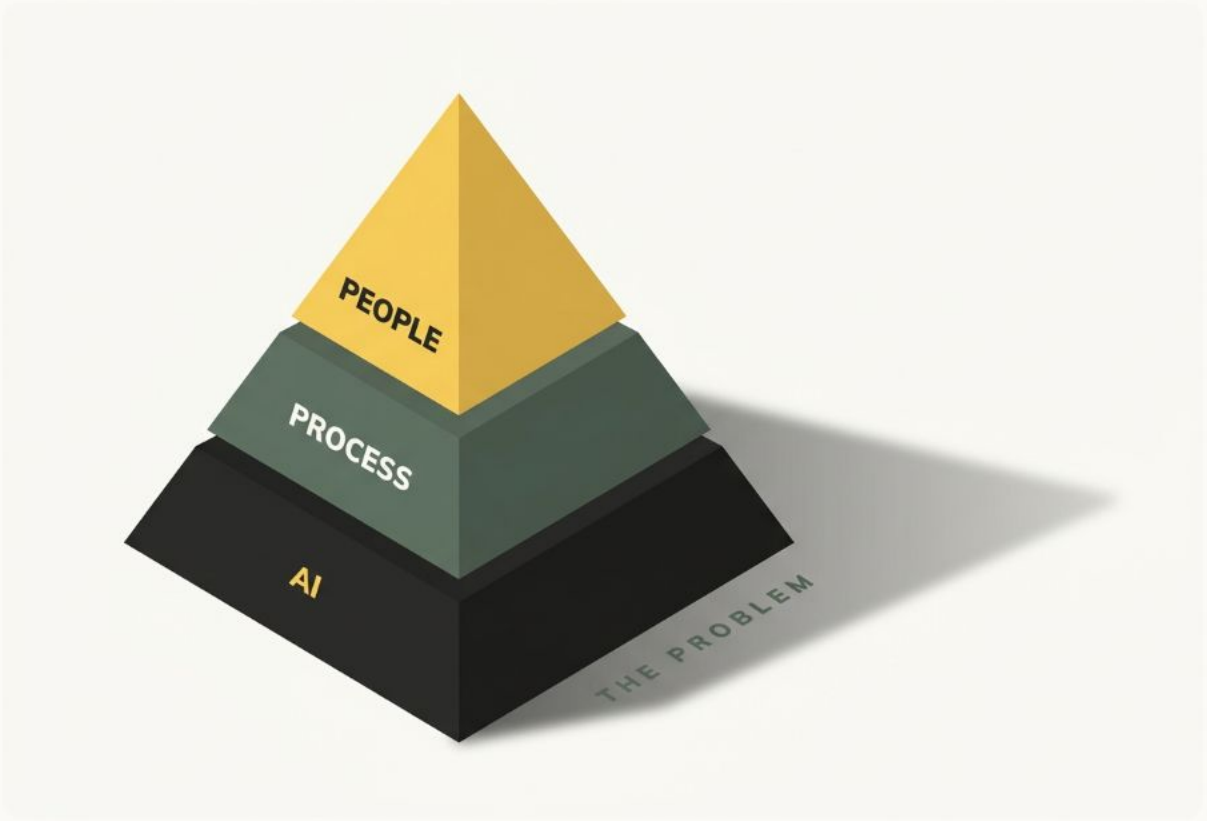

Subscriptions get bought, half set up, then quietly abandoned.

Too Many Vendors

Five providers, five contracts, and your staff are still handling brain-numbing admin & processes

OUR APPROACH

Root Cause Isolation. Then the Fix that Fits.

PEOPLE · THE TOP

Judgement: escalations, relationships and decisions, placed from our regional network.

PROCESS · THE MIDDLE

SOPs, playbooks and clear ownership, mapped correctly with you, so AI and people work from the same playbook.

AI · THE FOUNDATION

Carries the repetitive volume: enquiries, documents, first drafts and routine reporting.

THE SHADOW · YOUR PROBLEM

Your problems are symptoms of a root cause. We find it and fix them for you.

WHAT WE CAN SOLVE

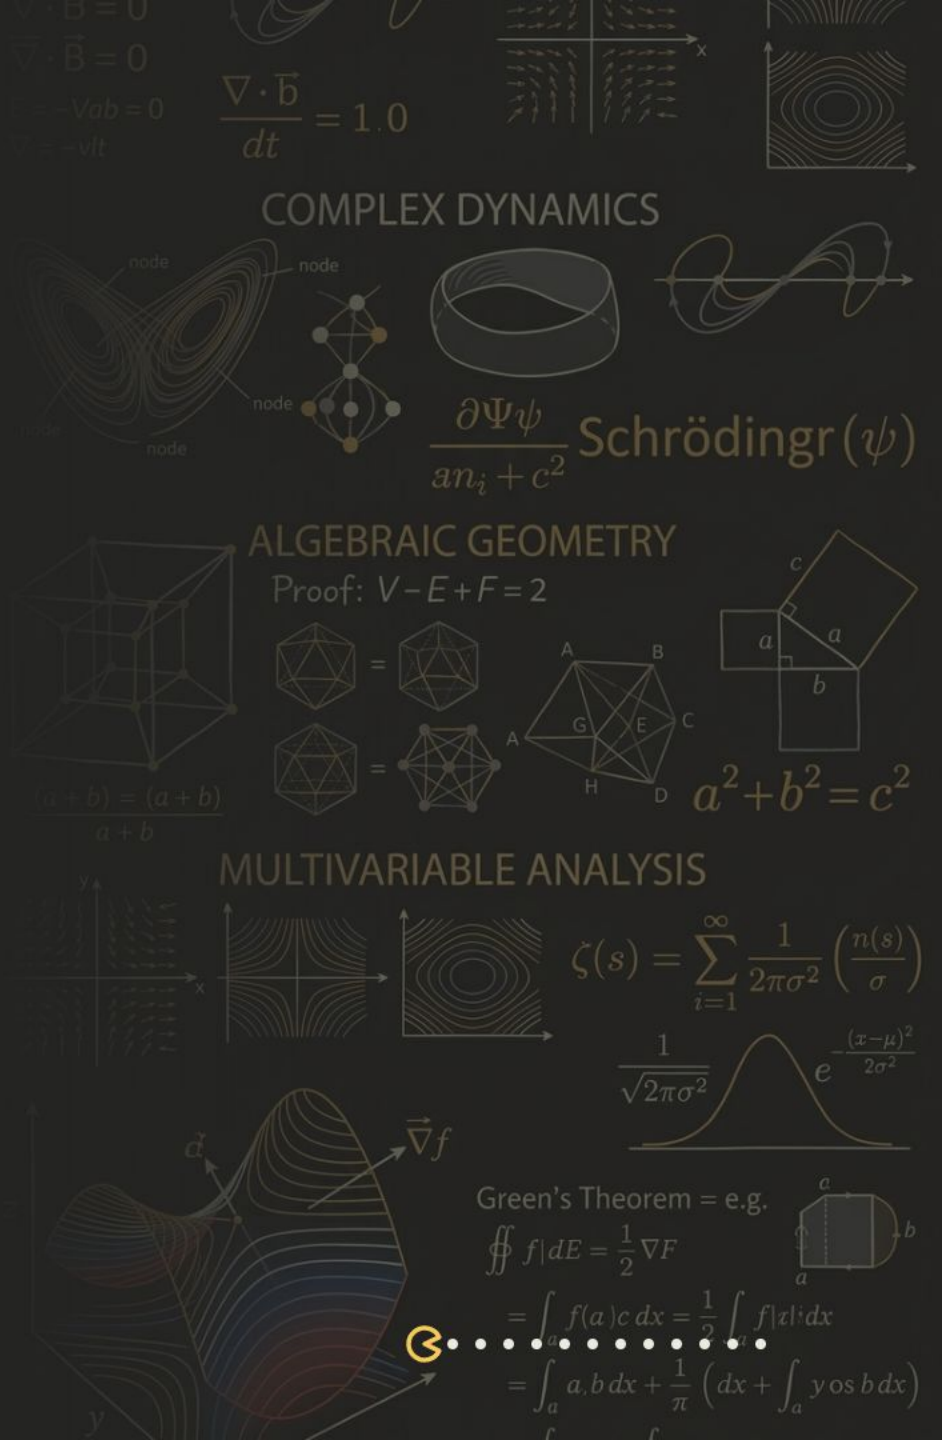

Reclaim hours of lost time and money with the right solutions

FUNCTION	Customer & Sales	Operations & Admin	Finance & Payments	People & Talent	Knowledge & Security	Market Entry & Setup
SYMPTOM	Same questions all day. Staff burning out	Clunky admin drains morale and retention	Manual invoice entry eats into real work	Slow hiring, too many applicants, few good hires	Know-how leaves with staff. Hacks go unnoticed	One person juggling five vendors
DESIRED OUTCOME	Fast, accurate AI answers. Leads followed up	Free up admin time for managers	Faster month-end, no hand-keyed invoices	Regional hires trained and ready for you	Knowledge retained, cyber risks managed	One partner runs the vendors. You run the business
ROOT CAUSE FACT-FIND	connectedcommons — *In depth discovery sessions with your team to isolate and fact find root causes to symptoms, and provide recommendations tailored to your staff needs*					
WORKABLE SOLUTION	CS assistant + multilingual VAs	Workflow automation + ops VAs and SOPs	Invoice processing + accounting partner	Screening support + dev, VA and HR outsourcing	Private knowledge centre + security partner	Setup checklists + corporate services panel

SCENARIOS

THREE SCENARIOS, WORKED THROUGH.

Illustrative scenarios based on common client situations.

SCENARIO 01 · ILLUSTRATIVE · THE CUSTOMER SERVICE CRUNCH

Weekend messages answered, without a third Singapore hire.

THE SITUATION

European e-commerce brand, 15 staff, selling into Singapore, Malaysia and Indonesia.

Enquiries arrive in three languages across WhatsApp, email and Instagram. Two staff answer the same questions all day, weekend messages wait until Monday, and a third Singapore hire is next.

TARGET OUTCOME

First response in minutes, weekend coverage, and no third Singapore hire.

WHAT WE FOUND

Most enquiries were order status, delivery and returns. None needed a person. The answers existed, scattered across old emails and one person's memory.

DELIVERED BY

Connected Commons, with an AI build partner and a VA placement partner.

CONTINUES MONTHLY

Assistant monitoring and updates, VA management, knowledge base upkeep.

THE FIX

AI

Multilingual assistant answering FAQs and order questions around the clock.

PEOPLE

One Philippines-based VA handling escalations and complaints.

PROCESS

A CS playbook and knowledge base that both work from.

SCENARIO 02 · ILLUSTRATIVE · THE DEVELOPER TEAM THEY COULDN'T AFFORD

Four more developers, on the headcount of one.

THE SITUATION

Seed-funded SaaS startup, Singapore entity, four founders, 18 months of runway.

They need four more developers for the next milestone. A Singapore team would eat a large share of runway, and local hiring takes months.

TARGET OUTCOME

A working team in weeks rather than months, at a fraction of the equivalent Singapore cost.

WHAT WE FOUND

Most of the backlog was well-defined feature work that didn't need to sit in Singapore. What they lacked was a team they could trust and a way to run it remotely.

DELIVERED BY

Connected Commons, with a dev outsourcing partner.

CONTINUES MONTHLY

Team management, delivery oversight and replacement cover when people leave.

THE FIX

PEOPLE

A dedicated Indonesia-based dev team, placed through a vetted partner.

AI

AI-assisted coding and code review to lift output per developer.

PROCESS

Delivery SOPs, sprint cadence and weekly reporting to the founders.

SCENARIO 03 · ILLUSTRATIVE · THE INVOICE THAT WASN'T REAL

The next scam invoice gets stopped before it's paid.

THE SITUATION

Electronics components trader, Singapore office, 30 staff, suppliers across China and Vietnam.

A long-standing supplier emailed new bank details from a familiar thread. Finance paid a five-figure invoice. The supplier's mailbox had been compromised weeks earlier.

TARGET OUTCOME

Fraud caught at the verification step, staff who spot the warning signs, and a baseline towards Singapore's Cyber Essentials mark.

WHAT WE FOUND

No payment verification step, shared passwords, no multi-factor login on email, no fraud training and no incident plan, including on PDPA reporting.

DELIVERED BY

Connected Commons, with a cybersecurity partner.

CONTINUES MONTHLY

Managed monitoring, phishing simulations, access reviews and playbook updates.

THE FIX

AI

Email security that flags spoofed senders, lookalike domains and unusual payment requests.

PEOPLE

A managed security partner monitoring accounts and responding to alerts.

PROCESS

Call-back rule for bank changes, multi-factor login, phishing drills and an incident playbook.

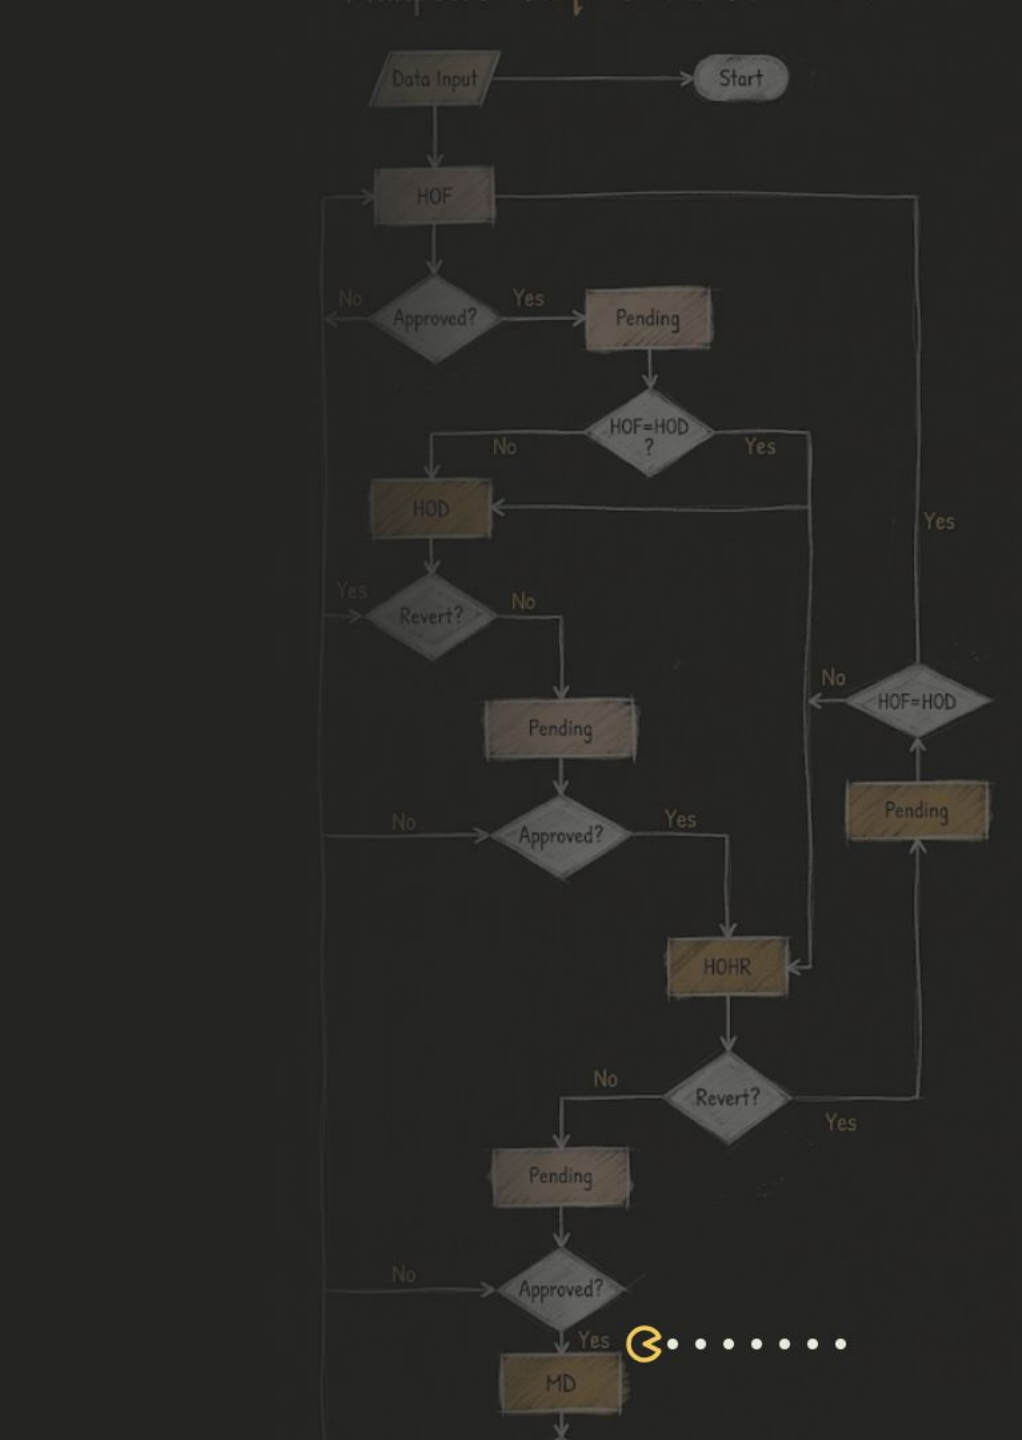

MORE SCENARIOS

More scenarios, and what changes once they're fixed

SCENARIO	THE PROBLEM	THE FIX	WHAT CHANGES
AI that can't leave the building	A regulated firm's staff paste client data into public AI tools, resulting in sensitive data leaks	A private, on-premise knowledge centre with usage rules and access controls.	Staff use AI daily, and client data never leaves your systems
Paper-heavy operations	Invoices keyed in by hand and a week-long month-end close.	AI document extraction, a redesigned approval flow and an accounting partner review.	A shorter month-end, with no invoices keyed in by hand
Setting up in Singapore properly	Five vendors for setup and nobody owning what comes after.	A single contact across a vetted partner panel, plus a compliance operating calendar.	One contact for setup, who stays on for monitoring

HOW WE WORK

FIND IT.
FIX IT.
KEEP IT FIXED.

THE ENGAGEMENT

Our Process/Feedback Loop

01 **Discovery call · Free · 30 minutes**
Find out in 30 minutes, free, whether we're the right fit.

02 **Fact-Finding**
Know what's wrong and what it costs to fix. The report is yours either way.

03 **Live-In Experience**
The fix is built on how your business really runs, not how it looks on paper.

04 **Build · Scoped project**
One build with the right partners, and one contact accountable for all of it.

05 **Test Run**
Nothing goes live until it works on your real cases.

AFTER GO LIVE Someone keeps it working, so it never becomes another abandoned tool.

FEES · A WORKED EXAMPLE · ONE VA PLUS AN AI CUSTOMER SERVICE ASSISTANT

What a fix costs, and what it replaces

MONTH 0	MONTHS 1 TO 2	MONTH 3 ONWARDS
Paid discovery	Build and test run	Go live and retainer
One-off fixed fee	Fixed fee for the solution	Monthly: headcount and maintenance

ITEM	HOW IT IS BILLED	WHEN	EXAMPLE
Paid discovery	Fixed fee	Month 0	$1,000
AI customer service assistant	Fixed fee for build and testing	Months 1 to 2, milestone payments	$6,000
1 x Philippines-based VA	Salary plus [25]% markup, as a monthly retainer	Monthly from go-live	$1,250 / mo
Solution maintenance	Retainer at [20]% of the build fee	Monthly from go-live	$1,200 / mo
Upfront total			$7,000
Monthly from go-live			$2,450 / mo
Traditional headcount hire	Salary plus CPF and recruitment	Monthly	S$ 5,500 / mo *Salary assumes current median salary of Singaporean worker

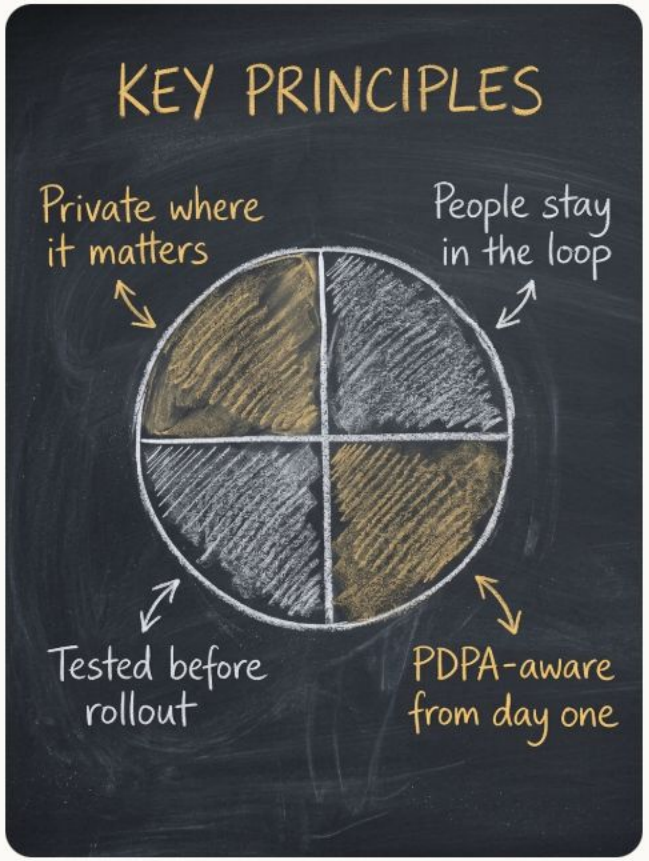

All charges are in US dollars (USD).
Illustrative figures. Solutions vary with scope; every engagement is quoted after paid discovery.

RESPONSIBLE AI

Built to be trusted with your data

01 · Private where it matters

Knowledge tools can run on your own hardware, with no internet dependency.

02 · People stay in the loop

Every assistant has a human escalation path.

04 · Tested before rollout

Nothing goes live until it works on your real cases.

03 · PDPA-aware from day one

Data handling is planned around Singapore's personal data rules.

PARTNER NETWORK

A specialist for every fix. One point of contact.

01 · AI Tech Solutions

Assistants and automation that keep working after launch.

02 · Outsourcing Services

Regional VAs, developers and HR support, without running the hiring and HR admin yourself.

03 · Cybersecurity

Fraud and breaches caught early, and a plan ready if one gets through.

04 · Corporate Services

Incorporation, company secretary, accounting and tax, handled by licensed firms.

WHO DELIVERS

One contact. A vetted bench behind it.

Licensed specialists deliver the specialist work. Connected Commons stays your single point of contact and stays accountable for the relationship, from the first call to ongoing support.

THE BENCH

- AI build & automation
- Cybersecurity
- Dev outsourcing
- Regional talent & VAs
- Incorporation & corporate secretarial
- Accounting & tax

FOUNDER

Ron Foo

Banking. Payments. Real estate. Logistics. Tech outsourcing. 16+ years running the operations Southeast Asian businesses depend on, including Singapore head offices with delivery teams in Indonesia and the Philippines.
